Claims 1-7 and 24 are presented for examination.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-7 and 24 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for certain disorders of diabetic complications, polyol accumulation, galactitol formation and expression of aldose reductase, does not reasonably provide ennoblement for the broad phrases of "a diabetic complication", "polyol accumulation", "galactitol formation" and "expression of aldose reductase". The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims. The instant specification fails to provide information that would allow the skilled artisan to practice the instant invention without undue experimentation. Attention is directed to *In re Wands*, 8 USPQ 1400 (CAFC 1988) at 1404 where the court set forth eight factors to consider when assessing if a disclosure would have required undue experimentation. Such factors were discussed in the previous office action. Applicant fails to provide information allowing the skilled artisan to ascertain the above conditions without undue experimentation. The instant claims read on all "diabetic complications", all symptoms of "polyol accumulation", all symptoms of "galactitol formation", all conditions of "expression of aldose reductase", necessitating an exhaustive search for the embodiment suitable to practice the instant invention. Applicant fails to provide information sufficient to practice the claimed invention, absent undue experimentation.

The newly submitted amendments necessitate the new ground of rejection.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
